About Me

I am a web developer with experience in HTML, CSS, Tailwind CSS, Laravel, and Flutter. In addition to focusing on web development, I have taught at SMK Merdeka and SMK Diponegoro. Won 3rd Place in the SRC National Web and experienced in organizations such as OSIS. I always try to provide creative and effective solutions in every project I work on.

Education

2024 - 2026 | SMK IDN BOARDING SCHOOL SOLO

Software Engineering at SMK IDN Boarding School Solo teaches students to develop software applications from design to implementation. This major focuses on programming, web development, mobile applications, and database management, providing a strong foundation in information technology for careers in the digital world.

Project

2025 | Website DisambiPhotoworks

DisambiPhotoworks is a professional photography service website that makes it easy for customers to view portfolios, choose packages, and make bookings for events such as weddings and other events with a simple and efficient user experience.

2025 | Application Online Shop

online shop application that offers goods and many other products and this application is made using flutter and firebase

experience

2024 | Teaching at Merdeka Vocational School, Bandung

Teaching at SMK Merdeka Bandung with a focus on Tailwind CSS, helping students understand how to build responsive, modern, and efficient website displays using utility-first frameworks.

2024 | Teaching at Diponegoro Brebes Vocational School

Teaching at SMK Diponegoro Bandung with a focus on UI/UX Design, guiding students in designing application interfaces that are attractive, easy to use, and provide an optimal user experience.

2024 | GDG Bogor

Attending the Google Developer Group (GDG) Bogor event to broaden your insight, relationships, and deepen your knowledge in the field of technology and web and mobile application development.

2025 | GDG Surabaya

Attending the GDG Surabaya event with the topic of Cloud Computing to expand knowledge about cloud technology, cloud service implementation, and efficient and scalable cloud-based application development.

2024 | ID Camp

Join ID Camp with Flutter material to deepen your skills in building multiplatform mobile applications, from the fundamentals to creating responsive and modern applications.

Prestasi

2024 | 3rd Place Web SRC

Won 3rd place in the SRC national level Web Development competition, with an interactive and responsive website project using Laravel and Tailwind CSS technology.
